Altegro Website Update

8 October 2026

Changes made

- Personal alert settings, including severity and quiet hours.
- PDF reports, with CSV and JSON exports still available.
- Admin dashboard with system and email status.
- Monthly maintenance calendar and mobile alert summary.
- Customer portal showing fleet, service, and maintenance status.
- Dark mode and French language option.
- Maintenance recommendations based on robot data and alerts.
- Security audit summary for administrators.

Safety

- Customer portal is read-only.
- Maintenance recommendations are advisory.
- Passwords and provider credentials are not shown.

Recommended next steps

1. Add secure sign-in with multi-factor authentication.
2. Move the remaining pages to the new interface.
3. Add customer reports, documents, and ticket tracking.
4. Add a live fleet map.
5. Test backups, security, and multi-server operation.
6. Test integrations with approved provider accounts.

Verification

- Server syntax check passed.
- Backend regression tests passed for earlier API changes.
- TypeScript check passed.
- Production build needs Node.js 20.9 or newer.
